Projects

full stack web application
simple to-do app built using the MERN stack. The front end is built with React, the back end is built with Node.js, and the database is MongoDB. The app allows users to create, edit, and delete to-do items. It also allows users to mark to-do items as complete

Weather app
Made a real-time weather updates app for any location worldwide. With a clean and intuitive user interface, users can easily input their desired location and receive instant weather information. Leveraging APIs, WeatherNow fetches and displays accurate weather data, including temperature, humidity, wind speed, and weather conditions. This JavaScript-powered weather app showcases the versatility and power of the language in delivering a seamless user experience for staying informed about the current weather conditions in any part of the worl
